

TOP SECRET SENSITIVE

15 November 1968

MEMORANDUM FOR THE RECORD

Morning Meeting of 15 November 1968

Godfrey briefed on the manner in which our publications have been playing the rumored threat to Berlin.

D/ONE recommended and the Director concurred in the classification of the Southeast Asia after Vietnam Estimate as Secret/Sensitive in order to limit to 150 the number of copies distributed.

DD/S observed that all but three of the fifty people on the President-elect's list have been cleared in two and one-half days.

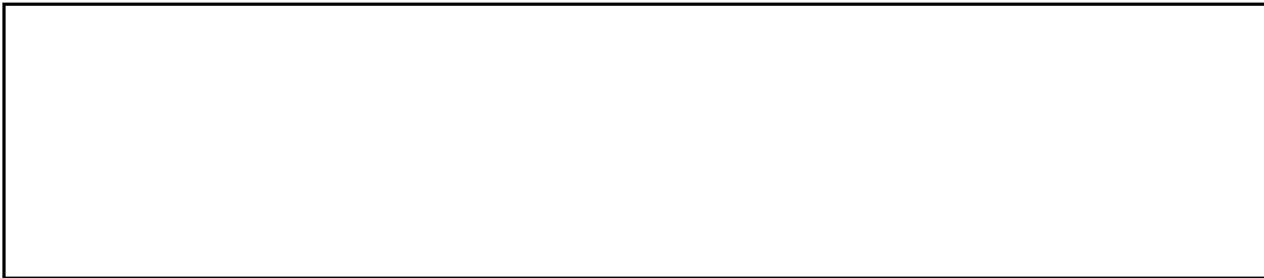

Carver noted a cable in from Saigon indicating that the South Vietnamese may be coming around on the negotiations.

Carver advised that he will be attending a State Bureau of East Asian and Pacific Affairs meeting of outside consultants on non-China matters.

Maury reported that Carver will be briefing Senator Hollings this morning on Vietnam. Maury will raise in low key the possibility of the Senator's visiting Headquarters for breakfast with the Director.

TOP SECRET SENSITIVE

25X1

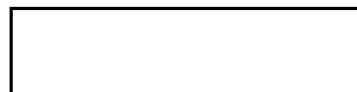

DD/S&T reported that we now suspect there may be animal life aboard Zond-6, since the Soviets indicated that worms, flies, and turtles were aboard Zond-5. This tends to confirm the notion that the Soviets are indeed racing to be first with a manned circumlunar flight.
